This would be done transparently to all connected allottees irrespective of the fact that the bidder has indicated or not the requirement of additional Natural Gas in their bid. In case, some of the consumer (s) does not accept the additional allocation, then the Natural Gas would be offered to other consumers, if any, on pro-rata basis subject to their acceptance. In case any Natural Gas is left out, then such quantity would be tied-up through open bidding process.</p> <p>The bidders would be required to off-take such additional Natural Gas within maximum 60 (Sixty) days from Date of allocation. SPECIAL TERMS FOR SALE OF GAS

1. Details of Natural Gas:

i) What is natural gas?

Natural Gas is a vital component of the world's supply of energy. It is one of the cleanest, safest, and most useful of all energy sources. Unlike other fossil fuels, however, natural gas is clean burning and emits lower levels of potentially harmful byproducts into the air.

Natural gas is a combustible mixture of hydrocarbon gases. While natural gas is formed primarily of methane, it can also include ethane, propane, butane and pentane. The composition of natural gas can vary widely

ii) Where can one use gas?

One requires energy constantly, to heat our homes, cook our food, and generate our electricity. It is this need for energy that has elevated natural gas to such a level of importance in our society and in our lives. Certain inherent qualities of gas make it an ideal feed stock for manufacture of value added end products and also as fuel superior to conventional fuels such as coal, oil, etc.

Gas can provide clean and flexible firing conditions with total absence of combustion wastes. It eliminates expensive fuel storage facilities as delivery can be made through pipelines. The use of gas can help to reduce operating and maintenance costs. It is environment friendly.

o Gas as a feed stock

Depending on its composition, natural gas can be used as a feed stock for manufacture of fertilizers, carbon black and petrochemicals like ethylene, methanol, etc.

o Gas for power generation:

Gas can be effectively used to generate power, such as cogeneration/combined cycle plants which can operate at a much higher thermal efficiency than conventional thermal power plants and supply steams for utilities in addition to power.

o Gas for Industrial use

In the Industrial Sector, gas can be used for a variety of purposes such as:-

- Manufacturing of sponge iron;
- Melting of metals like aluminum, brass, zinc and its alloys;
- Non-ferrous strip heating and reheating of pellets and slabs;
- Making ceramic and porcelain ware, bricks, tiles, etc.;
- Heating of liquids on industrial scale in direct vat and tank heaters;
- Fluidized bed furnaces where precise temperature control is required;
- Manufacturing of glass and various glass products;
- Manufacture of various chemicals;
- Many more applications o Gas for transport sector.

o It is well known that our cities and towns are seriously affected by air pollution due to industrial and transport exhausts and emissions. Natural gas is a welcome alternative to petrol and diesel in transport sector. It will also substantially reduce such air pollution.

- o The Compressed Natural Gas (CNG) is also vended through some outlets in Mumbai, Delhi, Gurgaon, Ahmedabad and other cities where motor vehicles run on it.
 - o Gas for household and other commercial uses.
 - o Natural gas is an excellent alternative to LPG, Kerosene oil and other fuels. Piped gas in towns can be used in homes, commercial establishments, hospitals, hotels and schools. Piped natural gas inside kitchen is much safer alternative comparing to LPG.
2. What is the proposal?
- LNGBL on behalf of ONGC plans to sell Natural gas to prospective consumer(s) / interested buyer(s) on fall-back and as is where is basis from ONGC PEC CA-17 marginal nomination fields in KG basin at the available pressures at the fence of ONGC's installations.
- It is to be noted that the successful bidder(s) need to set up gas treatment facilities like Gas Dehydration Unit, Mechanical refrigeration, gas compression to comply with PNGRB specifications prior to transferring/delivering the gas to GAIL piping network.
3. LNGBL/ONGC would be inviting tender in two bid system. Bidder would be asked to submit their response/bid within stipulated period.
4. The bid should be from users of Natural Gas including resellers. The bidders submitting the bid for the indicated uses of Natural Gas would be required to submit necessary statutory / regulatory compliances after allotment of Natural Gas and prior to commencement of Natural Gas off-take.
5. The Natural Gas under the tender is from marginal nomination fields allocated to LNGBL under Production Enhancement Contract where production is small and fields are isolated and Natural Gas is at low pressures, therefore, the Natural Gas shall be made available ex- ONGC fence shall be as per Special Terms for Sale of Gas. It would be the responsibility of the bidder to make arrangement for evacuation of Natural Gas from fence of ONGC, installation/facilities for GDU & MRU processing and CO₂ & H₂S removal if applicable, including transportation and compression facilities, if any. It may include but not limited to the following-
- i) Laying its own pipeline from LNGBL/ONGC's delivery point to its proposed plant/unit. The Bidder shall lay the pipeline at its cost and risk. All the expenditure involved in these respects, including but not limited to crop compensation etc. shall be borne by the Bidder. The Bidder shall be exclusively responsible for obtaining Right of Use (ROU) and necessary approvals from State and Central Government, if any. For laying of dedicated pipelines, prior submission of application/proposal for laying of dedicated pipeline to PNGRB is required under the provisions of the Petroleum & Natural Gas Regulatory Board (Authorizing Entities to Lay, Build, Operate or Expand Natural Gas Pipelines) Regulations, 2008.
 - ii) Bidder may have to compress the gas and evacuate the same through any local pipeline network in the area, if available, by finalizing the gas transportation arrangement with the available transporter by entering into requisite 'Gas Transportation Agreement' (GTA). In case bidder is wishing to enter into GTA, then it would be the responsibility of the bidder to ensure to meet the quality requirement for transportation, availability of sufficient surplus capacity in the transporter's grid/pipeline system to accommodate the allocated gas, etc. It would be the responsibility of the bidder to carry out further treatment of the gas for undertaking its transportation, if any.
6. Duration of Availability of Natural Gas:
- i) The Natural Gas profile provided in the tender is based on current study and understanding of the reservoir/field, which may vary based on the future exploratory efforts/inputs and the profile may be revised for a longer duration. The Gas Supply Agreement would be operative from the date it is signed/awarded and shall continue till availability of Natural Gas from the

field as per profile and the contract shall be renewed or extended with mutual consent with respect to availability of Natural Gas from the field & LNGBL's / ONGC's ability to supply with the same terms and conditions. LNGBL as a prudent operator shall endeavor to supply Natural Gas based on its contractual commitments.

- ii) For providing some stability, it is proposed that the 'Term' of Natural Gas contracts from small/isolated fields uniformly be maintained as follows with a provision for renewal/extension subject to Natural Gas availability and LNGBL's / ONGC's ability to supply:
 - a) Five (5) years Term or till such time the profile can support.
7. The Natural Gas would be from the source/fields indicated in the tender and LNGBL/ONGC as a prudent operator shall endeavor to supply Natural Gas from such source uninterruptedly subject to availability. In case of reduction in quantity or complete non availability of Natural Gas during the contract period due to reasons primarily attributable to the geological reservoir uncertainties & complexities, other complications in the fields/wells or any reasons whatsoever, LNGBL / ONGC shall not be responsible nor it shall be an issue for arbitration or a matter of dispute in Court of Law. The bidder shall make all necessary provisions for creation and maintaining dual fuel capabilities in order to meet their fuel requirement by an alternative fuel/substitute to natural gas, as and when Natural Gas supplies are interrupted or discontinued for the reasons mentioned.
8. Bidder to submit their project report indicating inter alia project details for evacuation and utilization of Natural Gas it has bid for. The project report should deliberate on Natural Gas evacuation & utilization in detail.

12. The Bidder shall acquaint himself with the proposed site, its approach roads, working land available, availability of gas, etc. before submitting the bid. The bidder shall study carefully the conditions of the bid document, to fully appreciate the Scope of Bid before submitting the bid. Submission of bid by bidder shall mean that bidder has fully studied and acquainted himself with the site conditions and the tender conditions.
13. Custody transfer metering / measurement facility along with required infrastructure will be created by LNGBL.
14. The taxes, levies, etc. would be extra and should be considered over and above the gas price. This should be multiplied by allocated Natural Gas quantity in SCMD for Forty Five (45) days. This L/C would be valid for one year period. Natural Gas supply to the Bidder shall not commence unless L/C or Cash Deposit towards payment security is furnished.

 - 2.9.4 Bids where price is disclosed in techno-commercial (un-priced) bid,
 - 2.9.5 Bids who are not meeting commercial eligibility criteria under Para 2.2 above.

- 4.4 Out of qualified bids received against the tender, the Natural Gas from the fields would be first fully allocated to the bidder who has quoted the highest premium over the reserve gas price in the Bid Schedule-Part-II (Price Bid) and its evaluated Natural Gas price is highest (H-1) on fall-back and as is where is basis.
- 4.5 In case, there are multiple bids having same highest price quote (H-1), (i.e., more than one bidder quoting the same highest premium over reserve gas price but different number of days for gas off-take, then
 - 4.5.1 Natural Gas would be first fully allocated to the bidder who has quoted the least number of days (“A”) for off-take of gas.
 - 4.5.2 Deleted.
- 4.6 In case, there are multiple bids from that field having same evaluated Natural Gas and have quoted same number of days (“A”) for off-take of gas, then the Natural Gas would be allocated to all such bidders on prorata basis in proportion to the Natural Gas quantity they have quoted in the Technical Bid vis-à-vis total Natural Gas available from the CA-17 cluster under the tender.
- 4.7 If surplus Natural Gas is left after the allocation as provided in para 4.4, 4.5 and 4.6 above or Natural Gas is becoming surplus on surrender by bidders including H-1 bidder, then the remaining bidders would be considered for Natural Gas allocation and such bidders would be asked to match the highest quoted price for getting Natural Gas allocation and give the unconditional confirmation on the same. Such unconditional confirmation would be asked in sealed cover within five (5) working days and these covers would be opened in sequential order based on original ranking determined based on their quoted premium over reserve price (i.e., H-2, H-3, H-4, etc.). This process shall be repeated until all available Natural Gas is exhausted for allocation.
- 4.8 If some of the bidders who does not match the highest Natural Gas price or does not respond within the stipulated time, his bid will be rejected and no claim of the bidder would be entertained. In case bidder is allocated quantity of Natural Gas less than their quotation, Bidder would be entitled to surrender entire/part of Natural Gas allocated. This would also be applicable to H-1 bidder. In case of surrender, Security Deposit would not be forfeited and surrendered Natural Gas would be allocated to other eligible bidders as per the process stipulated in the tender.
 - 4.8.2 If bidder backs out if the allocated quantity is less than their quoted quantity after signing of the Gas Supply Agreement, then in such case ONGC will forfeit their Security Deposit (SD). In such scenario, LNGBL / ONGC shall reallocate/redistribute surrendered quantity amongst other eligible allottees as stipulated in BEC.
 - 4.8.3 In case bidder is allocated quantity of Natural Gas as per their quotation, Bidder is either to accept or to surrender the entire allocation made to him. In case of non-execution of Gas Supply Agreement (after allocation) or surrender (even by H-1 bidder), entire Bid Bond / Security Deposit would be forfeited and the Natural Gas would be allocated to other eligible bidders as per the process stipulated in the tender. to ban/put on holiday (upto 2 years) the bidder as per ONGC policy in terms of Article 15.1 of Special Terms for sale of Gas (Annexure-II).

5.0 In case gas is left out (within tendered/advertised quantity) after the allocation as provided in para 4.4 to 4.8 (including sub-paras), then all the eligible bidders (bidders qualified under para 4.4 to 4.8) would be considered for total left out Natural Gas allocation and consent of the bidders would be sought for getting Natural Gas allocation at the H-1 price. The consent letters would need to be submitted by the bidders in sealed cover within five (5) working days and Natural Gas would be allocated as per demand indicated by the bidders.

In case, the total demand from all the bidders exceeds the total left out Natural Gas quantity, gas would be offered on pro-rata basis to all the interested bidders and their consent would be sought for such allocation. This would be done transparently to all irrespective of the fact that the bidder has indicated or not the requirement of additional Natural Gas in their bid. In case any Natural Gas is still left out, then such quantity would be tied-up through open bidding process.

The bidders would be required to off-take such additional Natural Gas within maximum 60 (Sixty) days from Date of allocation. Further, the bidder would be required to submit the Security Deposit for such additional allocation for issuance of NOA.

6.0 Bidder to go through the Terms and Conditions provided in the model Gas Supply Agreement. Any deviation to the Terms and conditions as provided in model Gas Sales Agreement will lead to rejection of bid.

General:

7.0 In case the production increases to a higher level than initially expected/advertised as part of the buildup and is expected to remain so on a sustained basis, then additional gas up to maximum of 50% of initially advertised quantity can be offered to existing allottees on pro-rata basis of their initial allocation made through tendering process subject to their acceptance. This would be done transparently to all connected allottees irrespective of the fact that the bidder has indicated or not the requirement of additional Natural Gas in their bid. In case, some of the consumer (s) does not accept the additional allocation, then the Natural Gas would be offered to other consumers, if any, on pro-rata basis subject to their acceptance. In case any Natural Gas is left out, then such quantity would be tied-up through open bidding process.

8.0 The bidders would be required to off-take such additional Natural Gas within maximum 60 (Sixty) days from allocation. Further, the bidder would be required to submit the Security Deposit and L/C towards payment security for such additional allocation

10.0 The Natural Gas would be from the CA-17 cluster indicated in the tender and LNGBL/ONGC shall endeavor to supply Natural Gas from such source uninterruptedly subject to availability. In case of reduction in availability of Natural Gas during the contract period due to reasons primarily attributable to the geological reservoir uncertainties & complexities, other complications in the fields/ wells or any reasons whatsoever, if Natural Gas supply cannot be provided, LNGBL / ONGC shall not be responsible nor it shall be an issue for arbitration or a matter of dispute in Court of Law. The bidder shall make all necessary provisions for creation and maintaining dual fuel capabilities in order to meet their fuel requirement by an alternative fuel/substitute to gas, as and when Natural Gas supplies are interrupted or discontinued for the reasons mentioned.
