The 15 minutes auto extension will start from the time of the first bid received within the last 5 minutes before the closure of the auction period. There will be unlimited auto extensions. In case the e-auction does not get closed within 18:30 hours of a particular day then the auction will get automatically paused and the same will be resumed at 11:30 hours of the next business day.
- 5.5.11. **E-auction termination:** The E-auction process ends if there is no bid revision in the period specified above of this RFP.

5.6 Determination of provisional quantity and final quantity allocation

- 5.6.1. During the bidding process, following logic would be used to determine provisional allocation and when there is any change in the price quote of the bidder/s
- 5.6.2. **Step 1:** The gas price bid will be arranged in descending order.
- 5.6.3. **Step 2:** The Provisional Quantity shall be determined as follows:
- A. Based on the initial quoted price, the Provisional Quantity shall be determined for the highest Bidder for the full volume which it has quoted (subject to the maximum volume bid). This quantity allocation process will be followed by the next highest Bidder for its quoted volume or remaining available volume, whichever is lower, and so on until the total available volume is fully allocated.
 - B. If there is a tie in the quoted price for any bids, and if the aggregate volume of gas quoted by these Bidders is less than the available gas volume, the Bidders will get volume allocated as per their quoted volume. In case if the aggregate volume of gas quoted by these bidders is more than the available gas volume, the available gas volume shall be pro-rated amongst the tied Bidders as per their quoted quantity.
- 5.6.4. **Step 3:** Steps 1 and 2 shall continue throughout the E-auction Process and the Provisional Quantity shall continue to be determined by the E-Portal dynamically, until the conditions for the closing of the E-auction Process as specified in clause 5.5.7 are met.
- 5.6.5. **Step 4:** Upon the closing of the E-Bidding Process, the Provisional Quantity determined based on the last bids received shall be considered as the Final Quantity for each Bidder.
- 5.6.6. At the end of the e-bidding process, all the successful Bidders would be notified regarding their respective allocated volume. Option shall be given to Bidders to surrender the gas allocation if the quantity awarded is less than 10,000 SCMD.
- 5.6.7. Surrender of gas allocation activities to be executed offline. Such Bidder needs to communicate (ongcgasbidding@mjunction.in) within 3 working days from the auction completion date. In case the bidder fails to notify ONGC of surrendering of gas, the gas shall be deemed to have been allocated and NOA would be issued thereafter.
- 5.6.8. Based on the result of the auction, ONGC will issue NOA and execute the GSA with the successful Bidders.
